

## **Spore-No-More Eliminator**

### **PRODUCT DESCRIPTION:**

*Spore-No-More is a chlorine based cleaner intended for removing mold, mildew and other contaminants from interior raw timber typically found in attics, crawl spaces, storage sheds as well as exterior surfaces such as concrete, cinder block, vinyl siding, aluminum siding and exterior painted surfaces.*

### **PERFORMANCE INFORMATION:**

*Immediate alteration of dark contamination, turning dark, ugly discoloration back to light, spore free surfaces. Easy to use. Surfaces that remain bare lumber can be coated with Spore-No-More "Klear Kote", containing a EPA registered fungicide, minimizing the potential for re-growth.*

### **Application and Reduction:**

#### *Interior:*

*Product is best applied via pump spray or trigger spray. May be applied by hand with paint brush or sponge pad applicator. Allow to sit on surface until all signs of contamination disappear. Allow 48 hours drying before coating with Spore-No-More "Klear Kote."*

#### *Exterior:*

*Apply with pump sprayer or trigger spray. For small areas use paint brush or sponge pad applicator. Allow to sit on surface until all signs of contamination disappear. Stubborn areas may require an additional application. Rinse affected areas with copious amounts of water via garden hose or power washer.*

### **COVERAGE:**

*On interior raw timber: App: 175 s.f. per gallon*

*On exterior surfaces: App: 250 s.f. per gallon*

### **Clean-up Information:**

*Tools and over spray may be cleaned up with detergent and water.*
